

Gemba rapid fire presentations

What is a Gemba Walk?

“Gemba comes from the original Japanese term ‘gembutsu’ that means “real things” or refers to the “real place”. This term is adopted to describe where the work is happening and a personal observation of the work.” Gemba Kaizen encourages collaboration amongst the whole patient care team. There is understanding amongst team members and within the organization that even small improvement in the process will lead to change over time.

Pressure Injuries and the Skin Champion

Sarah Pangarakis MS, APRN, CCNS, CCRN &
Jackie Feyereisen, RN, BSN, CCRN, SCRN

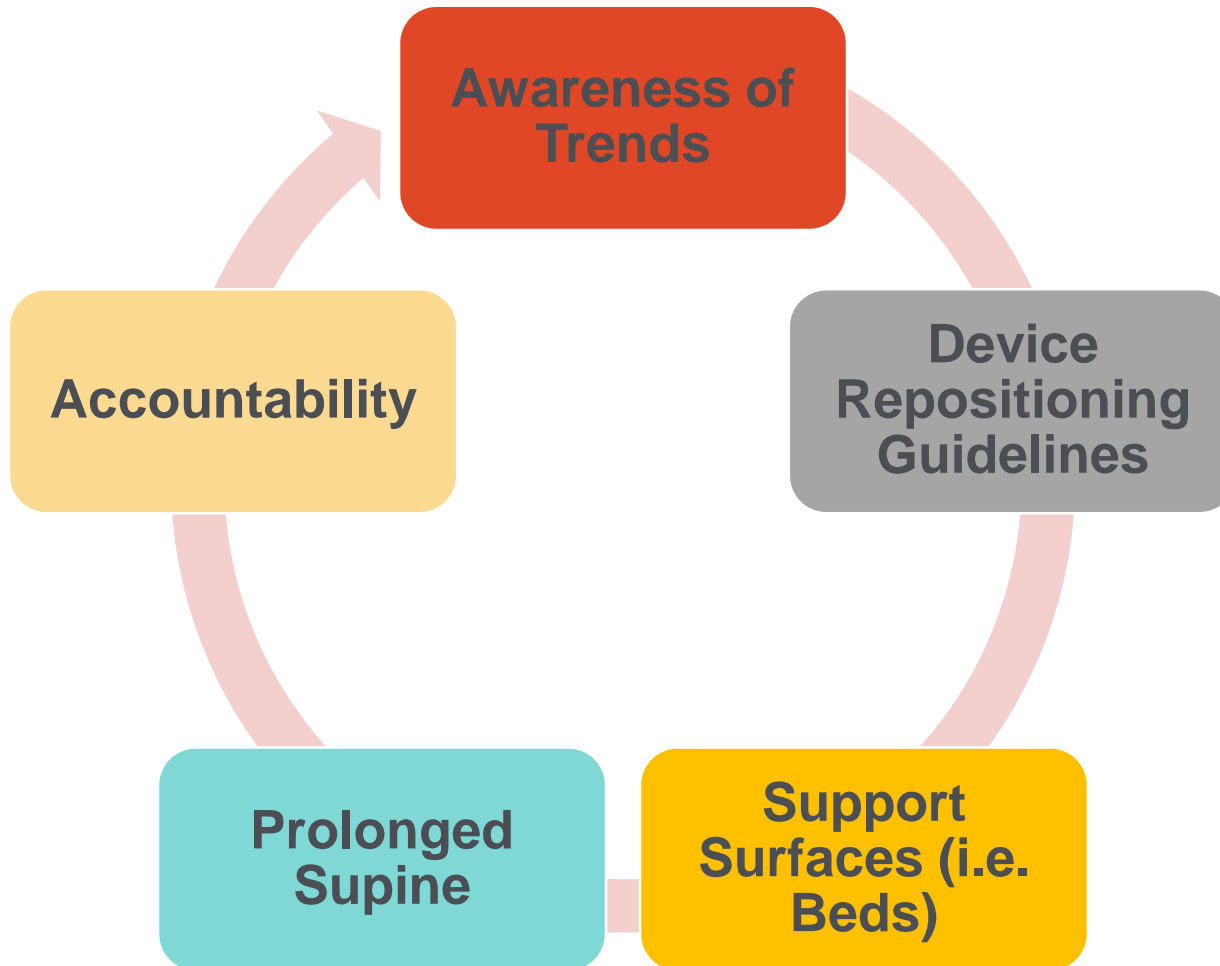

July 26th 2017

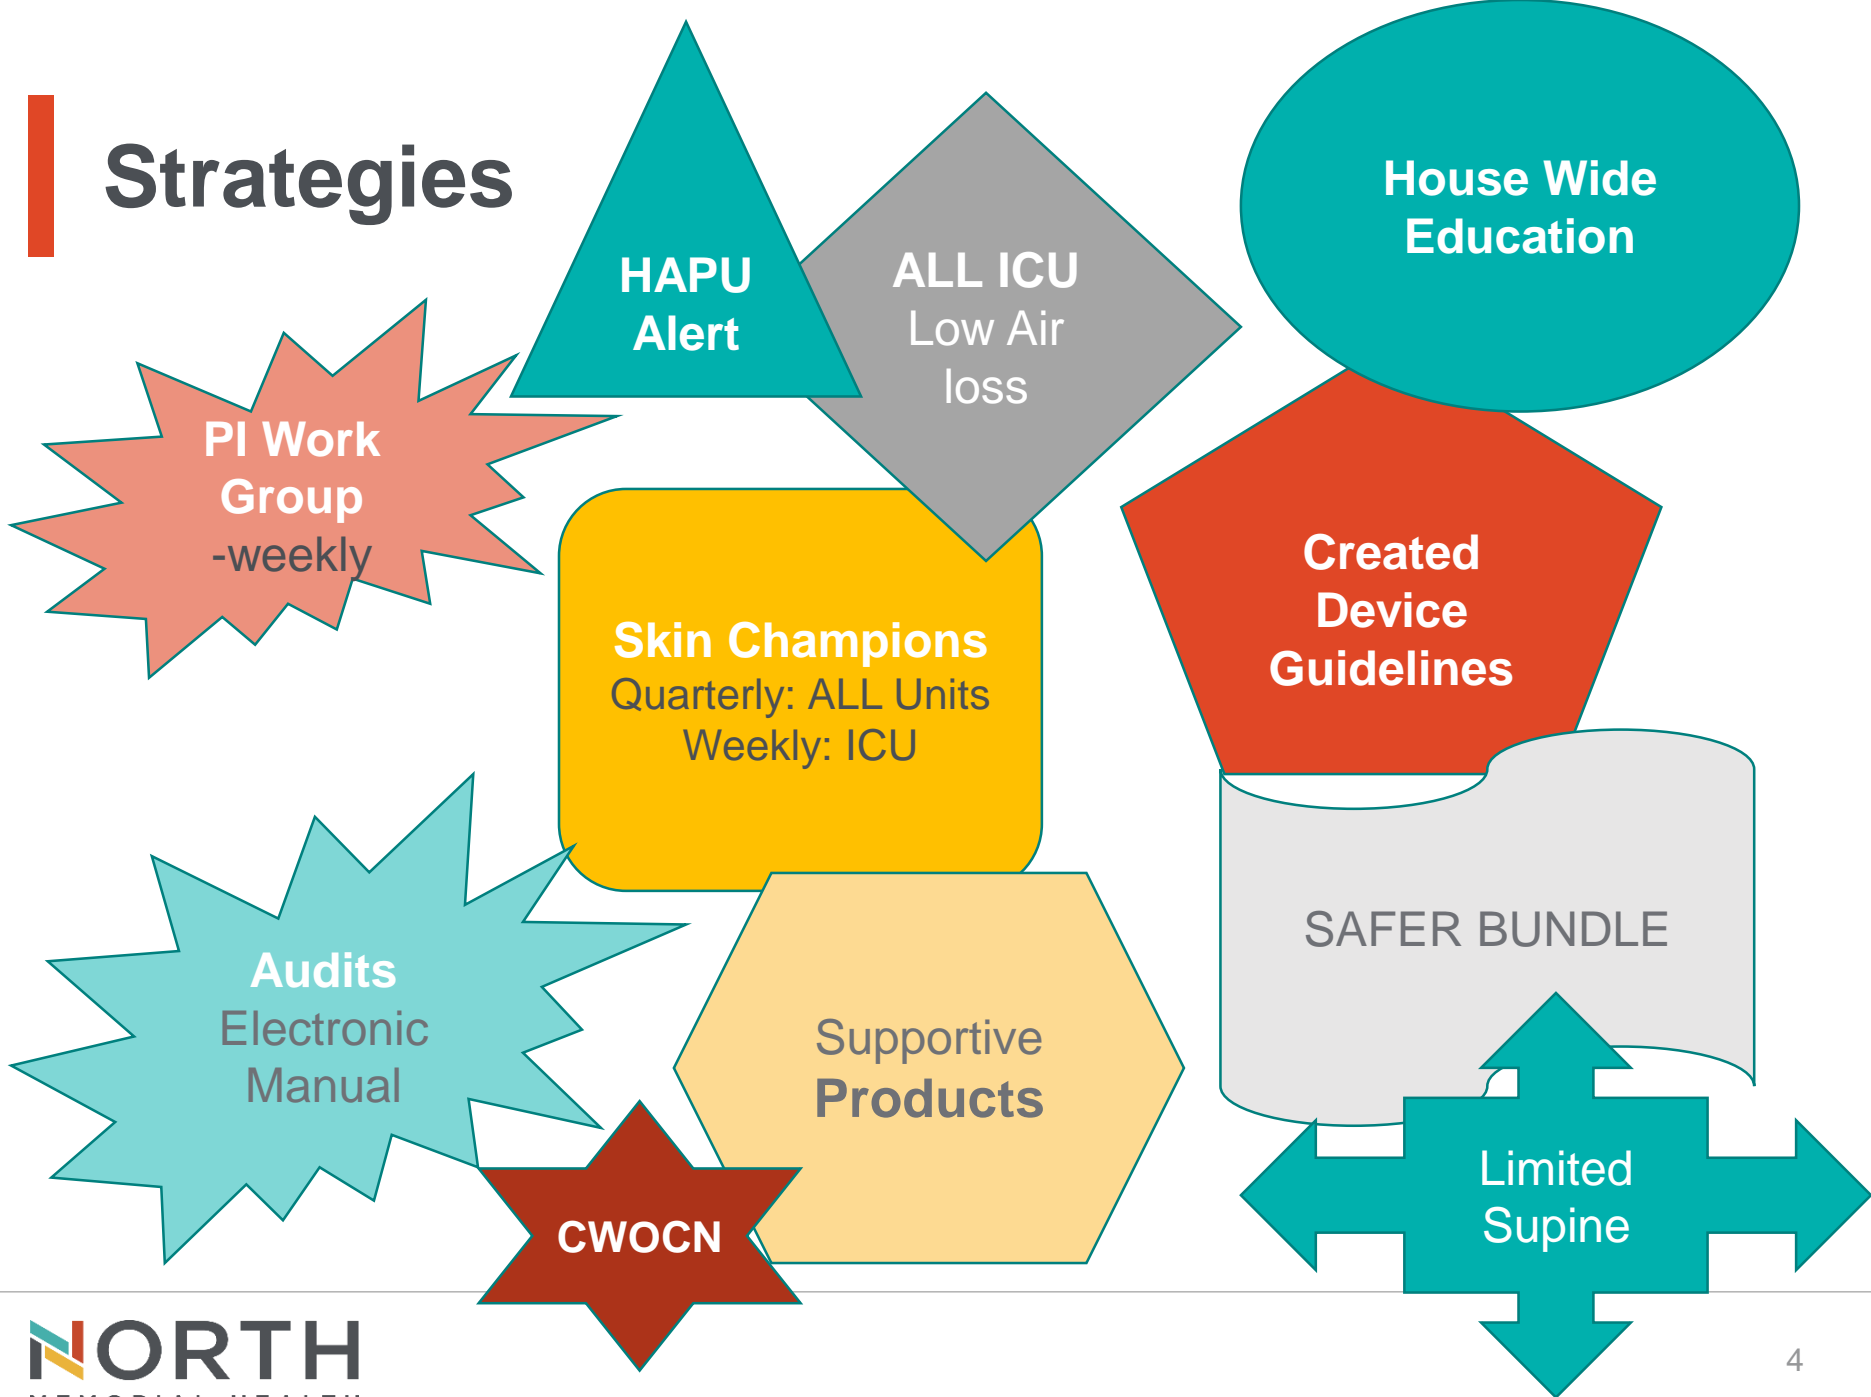

Barriers and Challenges

Pressure Injury Problems:

- Positioning
- Devices

Strategies

SAFER BUNDLE

S.A.F.E.R. bundle

S

Skin emollients and specialty bed

- Moisture barrier ointment twice daily
- Perineal cleanser PRN all incontinence
- Protective paste PRN fecal incontinence

A

Assessment and altered nutrition

- 2 eyes upon admission
- Head to Toe inspection every 4-8 hours per unit standard
- Real time documentation
- Place consult for dietitian, if nutrition component of the Braden score is less than 3.

F

Floating of heels bilaterally

- 2 pillow minimum
- Initiate heel float boots for hypothermia, CRRT, sepsis, impaired perfusion, diabetes, spinal cord injury, LE neuropathy, inability to maintain heel float with pillows
- Zflo: Lower Extremity splint/CAM/traction/immobilizer

E

Early identification and engagement

- Early Identification of Pressure Sources
- Engagement of Customer and Family
- Devices (RT, collars, NG, ETT, PPFT, splints, tubes, drains)
- Consider duration of pressure including pre-hospital risk factors

R

Reposition patient and devices

- At least every 2 hours (Braden score of 18 or less)
- Limit time spent on existing pressure points, limit supine/chair position
- Utilize turn and position system
- Reposition of tubes, lines and devices

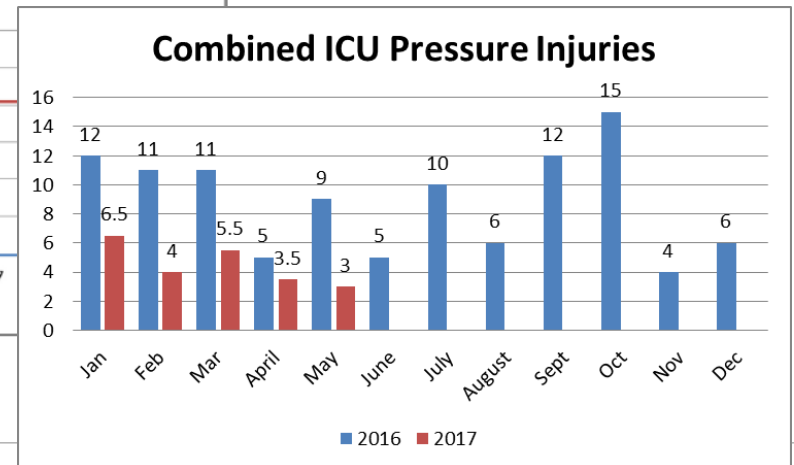

NORTH
MEMORIAL HEALTH

Data

- 2016

- 33% reduction in pressure injuries from previous reporting year
- Monthly rates consistently below goal = new goal for 2017

- 2017

Skin Champion

Role and Interventions

Role

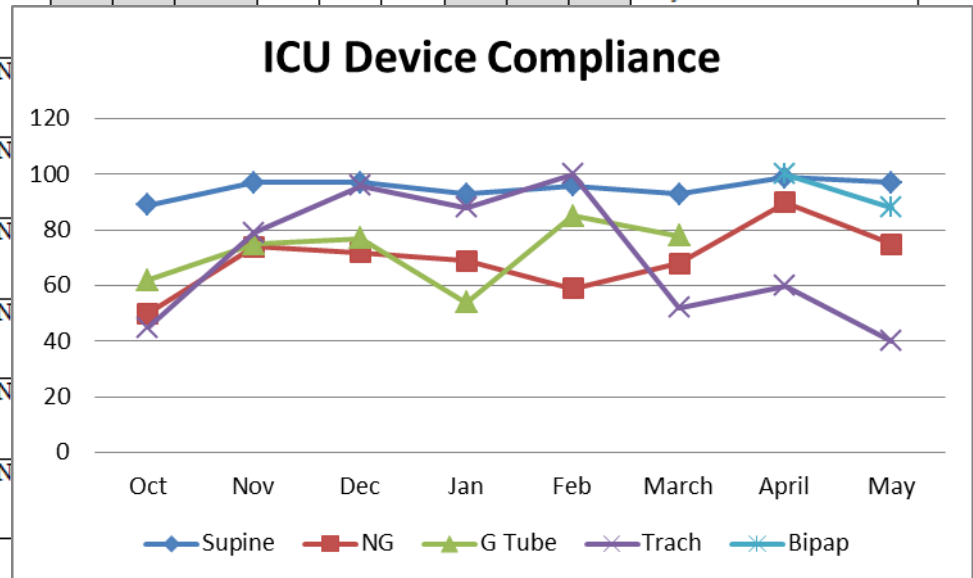

- Hospital Wide
 - Quarterly Meetings (4-8 hours)
 - Unit Audits
 - Product Feedback
 - In-services
- ICU Champion
 - Weekly (4 hours)
 - Device Audits
 - Just in time training/Interventions
 - Product reinforcement

ICU Device Audit

Skin Champion Device Audit | 2017

Name of Auditor: _____ Unit: _____ Date of Audit: _____

#	HAR	Rm #	Nasogastric Tube (Salem Sump, Feeding Tube, PPFT)			Bipap			Trach			Foley Catheter			FMS			RN
			Tube Repositioned, Taped, Assessed within the last 8 hours			Mepilex present/Bipap relief every 4 hours (e.g. oral care or alternative O2 source)			Trach cleansed, assessed, cares, dressing changed every 4 hours			Reposition every 8 hours			Reposition/rotate every 8 hours
