

Companies Participating in the RHTP Fund Program

Amergis supports Minnesota's RHTP by delivering locum tenens and direct hire staffing across nursing, allied health, physicians, and revenue cycle management to strengthen workforce sustainability and financial performance. Our services help rural hospitals stabilize critical service lines, reduce operational strain, protect access to care, and support long term, financially sustainable care delivery models aligned with RHTP transformation goals.

CliftonLarsonAllen (CLA) supports hospitals and health systems across the full Rural Health Transformation Program lifecycle. We help organizations identify and pursue RHTP funding through grant strategy, writing, and ongoing compliance, while also delivering advanced digital solutions—including assessments, system integration, Power BI and analytics, automation, software selection, and financial and profitability modeling—to turn grant dollars into measurable impact. Our teams also provide comprehensive cybersecurity services to help protect data, financial systems, and critical clinical and business operations. Finally, we support the back end with audit and compliance services, including Single Audits, to help organizations remain compliant after grant funds are deployed.

DexCare helps organize, govern, and activate the data layer that drives scheduling and patient flows across your hospital. We are the access platform that powers every patient journey. Whether a patient books online, connects through virtual care, calls your patient access center, or walks into urgent care, DexCare runs underneath every channel ensuring each one reflects accurate protocols, real-time availability and routes patients to the right care for their need. No wasted slots. No mismatched appointments. No capacity left on the table. By structuring your provider, schedule, and capacity data into one complete view, every booking surface works from the same source of truth so your resources are maximized and every appointment counts.

Forvis Mazars conducts an in-depth evaluation of the state's CMS-approved RHTP allocation and helps translate the information into an actionable strategy for accessing available funds with a focus on each organization's strategic plan and long-term sustainability. Once an actionable strategy is determined, we guide healthcare organizations through complex grant application submissions. Our grants management support assists organizations in addressing compliance requirements, eligibility considerations, and allowable cost standards across the full award life cycle. Our support is designed to streamline processes, improve visibility into grant activity, and help teams remain organized and focused on delivering services to their communities.

From application to action, Health Management Associates (HMA) supports turning RHTP plans into sustainable rural health solutions. We are a national leader in healthcare consulting, with a team of experts experienced in policy, finance, operations, IT, clinical services, analytics, and community engagement. Our team provides technical assistance to hospitals and health systems to support successful applications for funding and guide implementation to meet Minnesota's RHTP goals. HMA has successfully assisted clients with projects Minnesota has targeted for RHT, including establishing chronic disease prevention and management, creating regional care models, expanding access to medications for opioid use disorder, and supporting alternative payment/population health models. Our team will provide project management to ensure data is accurately tracked and reported, which is critical to secure funding throughout the program.

Health Carousel's RISE Workforce Transformation Model supports rural hospitals in building a sustainable clinical workforce through workforce development, retention programs, and expanded access to global talent. By combining career pathway programs for existing staff with structured onboarding and integration of new clinicians, hospitals can stabilize critical service lines and reduce reliance on temporary labor. RISE aligns with RHTF goals by improving access, strengthening workforce capacity, and supporting long-term sustainability.

At a time when margins are tightening, House RX is helping health systems capture high value specialty pharmacy revenue that is already being generated, but often lost to external pharmacies. Here are four ways we're delivering impact: (1) Recover Lost 340B & Specialty Margin - Hospitals typically lose 30 to 60% of specialty prescriptions externally, translating into \$1M to \$10M+ in missed annual margin tied to existing patient volume. (2) Launch Without Capital or Operational Burden - Stand up a high performing, in house specialty pharmacy model in 60 to 90 days. No need to build infrastructure, hire teams, or manage complexity. (3) Improve Patient Access While Driving Revenue - Faster time to therapy, better adherence, and tighter clinical integration, aligning financial performance with patient outcomes. (4) Revenue Increase - Our customer base has experienced a 71% increase in revenue after adopting the House Rx specialty pharmacy model.

HSG Advisors helps hospitals turn one-time Rural Health Transformation Fund (RHTF) dollars into sustained funding by building claims-informed, defensible work plans that clearly link investment decisions to measurable community needs and expected outcomes. Using market, patient flow, and provider analytics, HSG can guide hospitals on where to allocate funds across RHTF initiatives, so dollars are concentrated where they will move baseline metrics and meet CMS reporting expectations. We can provide the measurement and reporting backbone critical for demonstrating transformative performance and securing Years 2–5 funding tied to outcomes.

ISG partners with hospitals and health systems to plan and deliver facility and infrastructure solutions that strengthen rural healthcare. Our in-house architecture, engineering, environmental, and planning specialists work collaboratively and share comprehensive expertise across the Midwest. From master planning through design, commissioning, and on-call support, we design environments that thoughtfully address operational needs, safety, and flexibility—supporting better patient outcomes while enhancing staff satisfaction and long-term performance. ISG's flexibility makes it possible; our focus and innovative solutions make it happen.

Multiview is a healthcare ERP, ranked #1 by KLAS Research for small to mid-sized hospitals and trusted by 450+ rural and community providers. It serves as the financial and data backbone that makes rural health transformation actually work: connecting clinical activity, operations, and financial performance in one place. By modernizing cumbersome financial and supply chain processes, Multiview delivers faster, more accurate insight to drive efficiency, strengthen reporting, and support long-term financial sustainability.

StaffBook enables hospitals to eliminate reliance on expensive staffing agencies while reducing labor costs by 20%+ while gaining full control over workforce management. Through a simple web-based platform, facilities can access a flexible pool of local and regional clinicians and fill shifts on demand. RHTP funding can be used not just to implement the platform, but to build and deploy a dedicated, facility-specific workforce complete with credentialing, onboarding, and orientation so clinicians are ready to work from day one. This is a sustainable, long-term solution designed to replace agency dependency and not just manage it.

Stryker's Smart Care platform (Vocera + care.ai) helps rural hospitals maximize RHTF funding by transforming disconnected systems into a single, intelligent care environment. By connecting devices, communication, workflows, and virtual care, we enable real-time visibility, automate coordination, and reduce the burden on clinical staff. From Smart Rooms and virtual nursing to OR workflow optimization, our platform drives safer, faster, and more efficient care delivery. We partner with health systems to turn strategic funding into measurable outcomes across workforce, access, and operational performance.

Synergy Health Partners works exclusively with rural and Critical Access Hospitals to build sustainable surgical service line programs across General Surgery, GI, Urology, Orthopedics, ENT, and Anesthesia. Unlike traditional staffing models, our proprietary Service Line Leasing approach embeds fully managed, specialty-specific programs directly into the hospital delivering consistent physician coverage, predictable economics, and measurable clinical outcomes. We don't just fill shifts; we build programs. Synergy gives small and mid-sized hospitals the infrastructure to grow their surgical service lines, retain patients locally, and strengthen their financial position for the long term. Service line coverage options available from 5 days per month to 365 days per year.

TruBridge®

TruBridge supports rural and community hospitals and health systems across Minnesota by strengthening financial performance while improving operational and clinical outcomes. We combine HFMA peer reviewed and Black Book–recognized coding expertise, advanced revenue cycle management technology, and flexible outsourcing to reduce denials, speed reimbursement, and ensure payors are held accountable. Our approach improves financial health without disrupting patient care, backed by more than 45 years of experience serving over 1,500 healthcare organizations nationwide, including nearly 100 in Minnesota. TruBridge is a trusted partner to Minnesota providers as they manage financial pressures while continuing to deliver high quality care to their communities.
